AN IMPORTANT TRADE.

There will be a meeting of the congress of American states in New York in October, to consider both our political and economic relations with South America, Central Pentuary, 1884, the New York chamber of commerce unanimously adopted a memorial to congress concerning the extinction of our merchant marine. Even while the sub-ject was under consideration the Adriatic, the last American stonger, had pass foreign hands and under a foreign flag This memorial written by an eminent merforth the history of the birth and gre the steam marine of Great Britain France and Germany and the causes which led to the decline and death of that of the Writted States It showed how Great Britain by States It showed how Great Britain by her system of subsidies to steam anit hole graph lines was grasping the carrying trade of the world and placing the British mer chant in control of the conquerce of both our Atlantic and Pacific forts. We become in this report claimed that the United States could not hold the Ericken market's excent could not hold the foreign markets except by following the methods of Great Britain What the methods of Great Britain have been What the methods of Great Brian have been in the past and are to-day in Bustrated by the British steam system with South America. Of the £283,85 (nearly \$5 000,000) submidy paid-by-Great British in 1882 to more premish in lines to foreign countries, £250, 000 (nearly \$1,500 000) was to the Boyal Mail Bleam Packet Convant and the Pacific Bicam Packet Company and the Pacific Steam Navigation Company for semi outhly service on the cast and west coasts South America These services have or many years been weekly and the number of ports visited increased. This service was not established without cost to British government Lord Stanley, o Alderley, then postmaster general of treat Adderies, then postmaster general ser-Britain, in his report on the sea postal ser-vice, 1882, stated "That the American mails enr ordinary course entuil a heavy loss Of this less the greater part, £215 300 (over a million dollars) was made in the South American service. The British government fearlessly faced

the loss in its faith that the time would the loss in its faith that the time would come when this steem service would be self supporting and the subsidy in no instance exceed the sen postage and the subsidies have been withdrawn Of the value of the trade of Bouth America Mr Stevens fur niches some very interesting and significant

Beuron,
The total trade of the United States with
ill South America in 1861 was exports \$14
24 567, and imports \$33 262 912 The excess of imports over exports left a balance of imports the United States in 1871 of \$18,916 015 The total trade of the United States for 1864 was Exports \$410 850 818 imports \$300,775,825, total, \$761,632,643. The ede with South America was, therefore, 3% per cent of our exparts, 10% per cent of our imports and 6% per cent of our total trade. This record shows that the falling off of our exports for the seven years 1853 to 1850 and the increase of Lritish exports to Bouth America steadily followed the extension of British steam lines along the coast

In 1880 the total trade of the United State vith ali South America was \$31 6"3 383 ex ports and \$87 232 041 imports. The exports of gold and silver ore and bullion to all the mates were \$1.05,489 imports from the same \$1 134 009 loss to United States \$161 480 The balance of trade or excess of 1m ports over exports was \$55 508 (18 The toports over exports was \$55 505 106 106 to tal trade of the United States for 1881 was Exports \$625 204 507 imports \$72, (7114 total \$1.41+911.6.1 The trade with Scuth America was therefore \$25 per cent of our exports \$124 per cent of our exports \$1 exports, 12% per cent of our import 838 cent of our total trade

These figures are cited by Mr blevens to indicate the immense aggregate of our in orts from South America over our export rom 1865 to 1889 and to furnish a basis for has been lost to us by the diversion of the carrying trade to British bottoms in freights s, profitable employment for Ameri can seamen and also in the matter of ex change, to the benefit of Great Br am and the Continental powers '

Mr Stevens makes a similar presentation of commercial statistics to prove that a like disproportion between our exports and im ports exists in our trade with Vex co tral America and the West Indua is ands Mr. Stevens summarizes his facts as follows

## MOGER PODMIN

The South has by violence and fraud chbed the colored man of his voic robbed him of his rat representation in character and not content with this out age at 1 ropeses to insu t outrige ostracize and boycott every kederal officer at the South who in the execution of the civil service law appoints an intelligent decen' and competent man of color to a pitty offi e he has curred by his superior ability tested by a severe compen tive examination with white min-

reau of engiaving and printing some FO to 1000 white women in number of them of Bou hern blood and breeding. The messen gers of the bureau and of the treisury as a whole are largely composed of sectory as a In Washington there are in the soughe bu whole are largely composed of colored a co-who in the performance of their duty cone into close personal contact with everybody high and low but nobody ie ig is or ventures to propou id that idiotic commidmin. Do you want your daughte to marry a maper if marriage a matter of ourst taste and sym pathy, had anything to do with a esolve to protect equal political and civil me bis under conal laws from subversion or multilication

The North lacks horse sen a unbaye bright, eloquent, convivial full of t dont and withity but it behaves too much like a real with a city woman's head it locks of sense, it fights the inevitable and with a is all there is filling these appointments it is health and its strength in trying to prove that the world moves backward and was legislate Of course this coor prejudice is not due to physical repulsion etween the races for the South never grows weary of white washing the pure negro into and octoroons; the anstocratic South before the war was as a Iule suckled by negro

nurses and sported with negro children and planter be it said he is not chiefly responsible for this stunid anti-negro non-euse.

Governor Hebert, of Iousann who owned a thousand slaves before the war who fought for the Confederacy at Getty sburg after the war in an open letter approved by General Beauregard, made a vain appeal the South not to make a van appear to the South not to make an ass of itself by factious and maignant persecution of the negro. Governor Hebert argued that social matters regulate themselves, but since the war had freed the negro it was both justice and civil wisdom to win the confidence of a race that behaved with fidelity and humanity to the wives and children behind the Confe armies I we terrorize them we lose their confidence and selfish corrupt dechagogues will gain it Governor Hebert in 1873 de clared that he and Beruregard both believed that the true poincy for the South was for the state to protect the negro in all his political and civic rights granted him under equal I ederat laws that all the talk about the danger of nigger equality was as ab sird as it wou die to talk about the danger of second as it would be to talk about the danger of second as a secon of social equality with an illiterate foreign family fant because we refuse to allow him to be robbed at Castle Garden C eculed for the assertion of his faith in re ligion and politics

### TERRY'S DEMOCRATIC DEFENDERS.

When THE OREGOSIAN sand that "Judge Ferry throughout his career has been an experience and embediment of the character of pression and embodiment or the character of the deparametro party of our day, and that no man has more fully represented its intentions methods and purposes," it did not expect that substantial proof of the assertion would come from the newspapers that claim to speak for that party But the fact remains that the few newspapers that said aught with which to sympathize in the career augnt with which to sympathize in the taken and death of Desperado Terry, were democratic One of these newspapers, published in Pendleton, recognizes Terry as a bold, daring, aggressive man and says 'It is quite evident from the course which events took that Neagle had his orders from Wash nigton to kill Terry, on the slightest provo-cation and contrary to all law Terry was ot armed and the consequence Neagle and the department of national justice have committed a murder

The stupidity of such an utterance is only to be condened by throwing over the Penulleton democratic editor the mantle of charriy To charge that the great government of the United btates would through the department of justice stoop and lend uself to a conspiracy to murder David 5 Ferry is really attaining a higher degree of silly malice than this man has ever reached be fore It only goes to show that he permits his desire to score a point against the republican administration to obscure even the infinitesimally small amount of judgment that he possesses, but such treatment of this case is to be expected by representatives of that part; that has gained its strength by shielding political murderers, by elevating ballot frands to virtues, and that retained the only power it yet gained by suppressing the vote of a million citizens on account of a former condition

Terry was an average specimen of the seifstyle I chivairo is Southerner plentiful be He was more than a black guard. He was a pointical bush whacker. With him and those pointical bush whacker of his party brute recklessness was mistaken for honor and bravery and neither he nor his kind had any more place in a civilized and industrial community than the un tamed by ena upon the public thoroughare lie was only a fit candidate for citizenship in a community where law and order are secondary considerations and wherein the therty of man has degenerated into license His friends, abottors and supporters were democrats from such hedrew his sympathy and support. The world would have been bettered had it been possible to remove this man by process of law thirty years ago Let the democratic editor rush blindly into print to dolend his memory ring his vir judicial murder anthorized by the national government

It is the imperative duty of a'l government local state or national to inspire re spect for the instruments and operation of law. The department of justice at Washing ton realized this and the windom of protecting Justice Field has been demonstrated beyond doubt by the eyents that have occurred flere is little doubt but that had Justice field been alone and unprotected the nation would have been horrified with the spectacle of the malicious murder of a judge of the suprema court of the supreme court by a vile couple who fancied they had met with injustice at the hands of the court. There is but one expression in the mouths of good men and that is of unalloyed satisfaction that the law and honor of the United States have been unit usted and protected. The taking of hu man life is deplorable under all ercum tices lut when it is reckless windictive life as against low order and peace life

## TOUR IN THE INDIAN SCHOOLS

the office of Indian affairs is flooded with at it at one for appointment to teach in the several Indian sel oels that are conducted by the got runnent. It is the purpose of turem to employ no one for this work who would not be con petent morally and edu-cationally to take in the best scho-s for white children in the community. Fing ha-sis as placed upon the fact that those who are engaged in the Indian service should be persons of maturity, of vigorous health with some experience in teaching and with special fitness for the work." By this it is not intended that they should be possessed of the missionary spirit in the general ac-ceptance of that term but rather that they should be practical humanitarians quick to wee the good in human nature as well is the bad and ant in includes for cultivating the former and overcoming the latter Unexceptionable merals are for obvious

reasons a prime necessity in this work. A bitle further along m civilization a father or teacher may take the pipelrom his mouth to fo bid his on or pupl to smoke and follow up his command is a disquisition upon the case of tho too without being of oils hooted by his auditor that it has been found that preaching and tractice must agree when dealing with mun in his un it it and state. Dingence will work him up to the standard that has been achieved by cultivation after a time lut it requires self denying men to do the work hen e this point is properly in sisted upon by the Indian del irtment

sted. A man who comes droning out of bed at " o clock cannot be expected to teach the relations that early rising bears to thrift a way that will inspire savages, lazy by nature and thriftless through the workings of our Indian policy with a desire to be up and doing early in the morning if there is one quality eventuation to which next to decency and for dist should be usished user those will show a policy these most intential to the control of the contr en ict le iight by precept none l'er Lhrift

Anthony J Drexel a rich banker of Phil adelphia and an intimate friend of George W Childs will establish in that city a great industrial institute modeled after the Coop er Institute of New York. It will have ample facilities for the training of 1000 girls during the day and the same number of boys at might. The mattate will contain thereby at lecture half and all the best modern industrial machinery and appliances and the whole expense attached to carrying on the first might be begin by the families. great meatution will be horne by the founder Inc building will cost about \$1.90.000 and \$50.000 a year will be the expense attached to prosecute the glorious work. This is practi cal benevolence and is greatly in advance cat benevotence and is greatly in advance of orphan homes and similing distinctively charitable benefits. Industrial training is one of the great needs of our educational system and Mr. Drexels makinite will accomplish upon and lead and applied. complish much real good among all casses and especially the poor. It has the added therm of ante-morten benevience. He does not want to be canonized. He aims at improving humanity so that he can witness the benefit of his deeds during his own life time. The influence of such men aids the world in realizing that the millionaire the country are not all quite as black as the socialist paints them

When the late Judge Terry was a member of the supreme court of California it was an exclusively Southern tribunal, and when one Stoneali brought his slave Archie to the eaty of Sacramento and Archie claimed his liberty on that account, he was remanded to his master by Terry and his assecuates, and was only rescued through the efforts of Colonel E. D. Baker Among the members of the vigilance committee of 1866 was the late William Sharon who was afterward united States senator from California and the defendant in the celebrated suit the defendant in the celebrated suit brought by Sarah Althen Hill, a woman of ill fame who strove to prove that she was his wife Mr Sharon was then a man of in fluence with the business men of ban I ran cisco. He had been a friend of Justice Terry In his efforts to get his liberty Terry appealed to Sharon but Sharon recused to help him Terry never to got or Jorgave Among Ferry's active friends at that time was Brederick whom Terry slew in 18.9 It is said that Broderick at con-siderable expense (\$200 a week) hired three of the newspapers of the city to print articles favoring Terry 2 release.

NEW YORK'S GREAT CHEMIST.

This is to certify that I have analyzed Dr Price's Cream Brking Powder.

I find it composed of pure materials, compounded on correct scientific principles. The ingredients are accurately and scientifically proportioned. Hence, bread or biscuit prepared with it are better saited for digestion.
